TYPICAL OPTICAL CHARACTERISTICS CURVES

REFLOW PROFILE

- Soldering Condition

Recommended Soldering
After reflow soldering rapid cooling should be avoided

REFLOW SOLDERING		HAND SOLDERING	
Pre-Heat	160 °C ~ 180°C	Temperature	300°C Max
Pre-Heat Time	120 Seconds Max.	Soldering Time	3 Second Max - One Time Only
Peak Temperature	260°C Max		
Soldering Time	10 Seconds Max		
Condition	Refer to Temperature-profile		

- Temperature - profile (surface of circuit board)

Use the following Conditions Shown in Figure

- Recommend Pad Design (Units: mm)

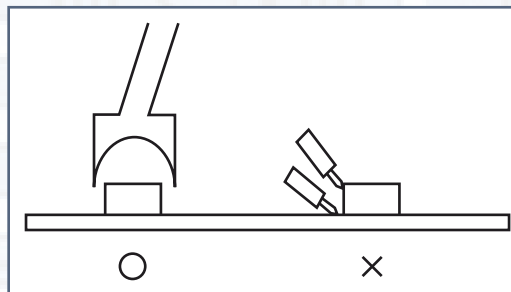

Reflow soldering should not be done more than two times
When soldering, do not put stress on the LEDs during heating

- Soldering Iron

When hand soldering, keep the temperature of the iron under 300°C, and at that temperature keep the time under 3 sec.
The hand soldering should be done only a time
The basic spec is ≤5 sec. when the temperature of 260°C, do not contact the resin when hand soldering.

- Rework

Customer must finish rework within 5 sec under 260°C
The head of iron can not touch the resin
Twin-head type is preferred

- Cautions

- Packaging Specification

- Reeled products (numbers of products are 4,000 pcs) packed in a seal off moisture-proof bag along with a desiccant one by one, Eighty moisture-proof bag of maximum are put the outside box (size: about 545mm x about 375mm x about 275mm) Together with buffer material, and it is packed. (Part No., quantity should appear on the label on the moisture-proof bag, part No. And quantity should appear on the label on the cardboard box.) The number of the loading steps of outside box (cardboard box) has two steps.

- Storage Conditions

- **Before Opening the Packaging** - The LEDs should be kept at 30°C or less and 70% RH or less. The LEDs should be used within a year. When storing the LEDs, moisture proof packaging with absorbant material is recommended.

- **After Opening the Package** - The LEDs should be kept at 30°C or less and 50% RH or less. The LEDs should be soldered within 168 hours (7 days) after opening the package. If unused LEDs remain, they should be stored in moisture proof packages, such as sealed containers with packages of moisture absorbent material. It is also recommended to return the LEDs to the original moisture proof bag and to reseal the moisture proof bag again.
